

WE'VE GOT CONTAINER CLOSURE INTEGRITY TESTING DOWN TO AN EXACT SCIENCE

Analytical and Solid State Services

Speed product development and improve the quality of your compound with solid state chemistry and analytical testing services.

CONTAINER CLOSURE INTEGRITY TESTING (CCIT)

As an independent, third-party laboratory, Whitehouse Laboratories (now AMRI) is a trusted testing partner for regulatory compliant container closure integrity testing as detailed in USP <1207>.

Our team of experts utilize state-of-the-art technologies to offer leak test method development and validation in a fully accredited, cGMP environment.

Leak test method development and validation specific to product-package system

- Vacuum decay leak detection
- High voltage leak detection
- Laser-based headspace analysis
- Helium mass spectrometry
- Parenteral vial capping optimization

Operating through a dedicated Container Testing Center of Excellence, the entire container testing team actively works with clients to ensure regulatory compliance is always met when it comes to container leak testing.

AMRI is a global contract research and manufacturing organization that has been working with the life sciences industry to improve patient outcomes and quality of life for more than 25 years.
